

COMMERCIAL LEASING

Our real estate attorneys have extensive experience with the leasing of all types of real property across the United States and abroad, including retail, office, industrial, mixed-use projects, undeveloped land/ground leases, and cell tower sites.

Having represented both landlords (from institutional owners to local developers) and tenants (from national tenants to start-up business and individuals) in connection with hundreds of leases, we understand the complex issues involved in leasing real property and draw upon our unparalleled expertise to consummate deals efficiently. Our expertise extends as well as to all other ancillary documents pertaining to the leasing of real property, like reciprocal easement agreements, development agreements, work letters, and recognition agreements.
